Interrupt the Human Life Cycle at many stages to raise awareness & train the mind

- Young children (primary school), teens (secondary school) and adults.
- Young children (primary school age) - engage with teachers and parents (and where applicable younger children). This will touch a minimum of 3 major groups within the human life-cycle system; young children, parents/carers & teachers.
- Older children (secondary school age) – engage with teachers, older children and parents. This will build on the primary program and touch 3 major groups; older children, teachers & parents/carers.
- Adults of any age.
